linkedin.com/in/annumudgal | github.com/annumudgal001 | [Portfolio](#)

Software developer delivering MEAN-stack features and API integrations for client applications. Project experience with Spring Boot, relational databases, transactions and JWT authentication.

PROFESSIONAL EXPERIENCE

Solutions Developer | iTech Mission

Sep 2026 - Present

Delhi | Full-time

- Develop data-processing endpoints for retrieval and submission using GET/POST, integrate Redis, and connect the API to request flows through a Laravel/PHP gateway.
- Deliver frontend and backend enhancements in a MEAN-stack microservices codebase for a live client application and a second application under development.
- Investigate defects by tracing request flows across application components; implement fixes and feature changes accepted and merged into the shared repository.

Software Developer Intern | Infosys Limited

Jul 2025 - Jul 2026

- Developed Java application features and REST APIs for an e-commerce proof of concept.
- Automated functional checks of application workflows using Selenium and Java.

Apprentice Web Developer | Yoma Technologies (BYLD Group)

Jan 2025 - Jun 2025

- Built MERN applications with React interfaces, Express/Node.js APIs and MongoDB persistence, implementing features across the frontend and backend.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Backend: Spring Boot, Spring Security, Spring Data JPA, Node.js, Express.js, REST APIs

Frontend: Angular, React, EJS, HTML, CSS

Databases: MySQL, PostgreSQL, MongoDB (Mongoose), Redis

Fundamentals and Tools: Data structures and algorithms, OOP, Git, Maven, Postman, Selenium

PROJECTS

E-Commerce Platform (POC) | Spring Boot, React, MySQL | [GitHub](#)

- Implemented REST endpoints using controller-service-repository layers, JPA persistence and validated request DTOs, connecting React shopping and administration flows.
- Wrapped order creation, inventory updates and cart clearing in a database transaction, with stock validation and price snapshots retained in order items.
- Configured JWT authentication and role-based API access with Spring Security; restricted order retrieval to the authenticated user and separated customer/admin routes.

BlogAPI | Node.js, Express.js, MongoDB, EJS | [GitHub](#)

- Built a blog publishing application with post CRUD routes, an administration interface and Mongoose schemas enforcing required fields and unique usernames.
- Implemented JWT verification middleware for post-management routes, bcrypt password hashing and expiring tokens stored in HTTP-only cookies.
- Added sorted MongoDB queries with database-level pagination and case-insensitive title/body search, rendering results through EJS templates.

EDUCATION

Master of Computer Applications (MCA)

2023 - 2025

K.R. Mangalam University | GPA: 7.82/10

Bachelor of Computer Applications (BCA)

2020 - 2023

Maharshi Dayanand University, Rohtak
